

CURRICULUM VITAE

- | | |
|----------------------------------|------------------------|
| 1. Презиме : | ЧОКРЕВСКИ |
| 2. Име : | Слободен |
| 3. Датум на раѓање : | 01.04.1967 |
| 4. Пасош и државјанство : | РС Македонија |
| 5. Контакт: | chokrevski@iarm.gov.mk |
| 6. Едукација : | |

Институција (датум од -до)	Стеknати дипломи -звања
Факултет за ветеринарна медицина Скопје Универзитетот на Св. Кирил и Методиј, 2009	Магистер на науки по ветеринарна епидемиологија (м-р)
Факултет за ветеринарна медицина - Универзитет во Белград, Србија, 1986 - 1992	Доктор по ветеринарна медицина (ДВМ)

7. Познавање на јазици : (1 - одлично; 5 - базично)

Јазик	Читање	Конверзација	Пишување
Македонски	Мајчин јазик		
Англиски	1	1	1
Српски, Хрватски	1	1	1
Руски	2	2	4
Италијански	4	4	5

7. Членство во професионални организации:

- Член на Експертската група за благосостојба на животните во АХВ (2018)
- Член на Советот на експерти на Министерот за земјоделство, шумарство и водостопанство на СРМ (2017)
- Hospes of *Ordinis Equestris Vini Europae* (2014);
- *Vinifera Erasmus Mundus Programme* Член на советодавниот одбор (2013);
- Membre d'Honneur de Cooperation et Echanges Veterinaires Est-Ouest CEVEO France (2012);
- Slow Food Macedonia, Основач и Конвивиум лидер (2005);
- OIE Делегат претставник на РМ (2002-2006) OIE Алтернативен делегат (2017)
- Европска комисија за Лигавка и шап - EUFMD во FAO, Рим (2002); Член на претседателството на EUFMD во FAO (2003); Потпретседател на EUFMD во FAO (2004-2006);
- Македонска ветеринарна комора (1992);
- Македонско здружение на ветеринари за мали животни MSAVA (1996);
- Кинолошки судија, Кинолошки сојуз на Р.Македонија (KARM), FCI (1994);
- Македонски клуб за шарпланинец (1995);

12. Клучни квалификации:

- Меѓународен експерт на Светската организација за здравје на животните OIE, Светската здравствена организација WHO, Светската банка и Европската Унија.
- Дваесет и девет годишно искуство и експертско познавање на ветеринарството, лабораториската дијагностика и безбедноста на храната; OIE стандардите, СТО-СПС договорот и ISO стандардите.
- Сертифициран евалуатор (PVS Pathway expert од 2007година) на Светската организација за здравје на животните OIE каде во точките II-1 и II-2 од ПБС евалуацијата се оценуваат лабораториските системи и нивните системи за контрола на квалитетот - laboratory QA, додека во PVS Gap Analysis методологијата во „Pilar IV – Laboratory Diagnosis“ се проценуваат финансиските ресурси потребни за изготвување на лабораториски анализи (број и видови на анализи) потребни за спроведување на активности на лабораториска мрежа на ветеринарните

служби. (<http://www.oie.int/support-to-oie-members/pvs-evaluations/oie-pvs-tool> и <https://www.oie.int/solidarity/pvs-gap-analysis/>)

- Работа во акредитирани лаборатории на ФВМС и во меѓународни референтни лаборатории.
- Заменик раководител на приемното одделение на Институтот за храна на Факултетот за ветеринарна медицина Скопје – согласно ISO 17025.
- Обука за лабораториска дијагностика во OIE Светските референтни лаборатории за лигавка и шап, син јазик, говедска чума, овчи сипаници (IAN Pirbright), бруцелоза (VLA Вејбриџ Велика Британија, IZS Терамо Италија, NVSL Ames Ајова САД) заразна agalactia (VLA Вејбриџ Велика Британија) заразна плевро-пневмонија кај говедата (IZS Терамо) Свинска чума (NVRI Pulawі Полска).
- Познавање на усогласувањето на националното законодавство со *Acquis Comunitaire* на ЕУ и изготвување и спроведување на законодавството за здравјето на животните, лабораториската дијагностика, синџирот на исхрана, идентификација и регистарација и благосостојба на животните;
- Преговори на меѓународно ниво, спроведување на меѓународните договори од областа на ветеринарството, безбедноста на храната и земјоделството;
- Градење на капацитетот и институционално зајакнување на државните ветеринарни институции;
- Обука на државните службеници во правната хармонизација, спроведување на серија од технички работилници за идентификација и регистрација на животните, здравјето на животните, здравјето на луѓето, управување со животинскиот отпад и нус-производи.
- Управување со кризи, вклучувајќи комуникација и односи со јавноста (птџи грип, лигавка и шап, син јазик, бруцелоза);
- Подготовка на јавната свест и организација на кампањи;
- Познавање на информативните системи, имплементација на идентификација и регистарација на животните и бази на податоци, следливост.
- Тим лидерство и менаџмент, дизајнирање на програми за работа и евалуација на трошоци и резултати;
- Унапредување на комуникацијата помеѓу владата и невладиниот сектор, стопанските комори и здруженијата на производители.

13. Земји на работно искуство:

Земја	Дата од до
Европа (Македонија, Србија, Хрватска, Босна и Херцеговина, Косово, Црна Гора, Украина, Грузија, Молдавија, Франција, Велика Британија, Италија)	1992-2019 (различни работни периоди)
Азија (Узбекистан, Таџикистан, Азербејџан, Пакистан, Казакстан)	2007-2019 (различни работни периоди)
Африка (Судан, Етиопија)	2007/2013

October 16 2019 Ongoing N. Macedonia	Institute for Accreditation of Republic of North Macedonia	Director of National Accreditation Body	According to the Law for Accreditation responsible for: Adoption of acts for the method of work of the Institute in line with the Macedonian, European and international standards as well as the with documents of the European and international accreditation organizations which regulated the operation of the Institute in greater detail; Adopt decisions for granting, refusal, suspension and withdrawal of the accreditation as well as of other decisions in line with the accreditation procedure and other assessment procedures for competency of the conformity assessment bodies according to a set of regulations ; Consider complaints filed against the method of work of the Institute and adopt follow up decisions; Adopt decisions (decisions for forming assessment team etc); Sign contracts with the accreditation applicants regulating the rights and responsibilities of the applicants of accreditation as well as of the Institute; Sign contracts with the assessors and experts regulating the rights and responsibilities of the assessors and experts and the Institute; When necessary forms commissions, committees and working groups for carrying out particular tasks;
November 2020- May 2021 Uzbekistan	World Organization for Animal Health OIE Ms Camille LOI- RAPINProgramme Officer, Veterinary Legislation Support Programme (VLSP) c.loi@oie.int	OIE PVS legislation expert	Preparatory Phase (Phase 1) of the Agreement on OIE technical support to bring the veterinary legislation of Uzbekistan into compliance with OIE standards and guidelines: i) support the country representatives in the preparation of the Preparatory Phase Work Summary Form; ii) write a Preparatory Phase report to the OIE communicating the results obtained and especially his advice on the feasibility of successfully undertaking the tasks under the formal Agreement itself; and iii) if entering the Agreement is recommended, transmit to the OIE the Annexes necessary to complete the Agreement as detailed in Annex 1 attached; or, if entering the Agreement is not recommended, transmit a draft memorandum which the OIE Director General can use as the basis for a letter to the country Delegate indicating why the OIE has decided not to enter into an Agreement.
2020/2021 Uzbekistan	World Bank/ Agro Industries and Food Security Agency (AFSA) of the Republic of Uzbekistan	International Consultant for Animal Identification, Registration, Movement Control and Traceability	Developing technical and legal documentation for Veterinary Services of the Republic of Uzbekistan in the framework of the Livestock Sector Development Project: FIRST STAGE I/Review and carry out gap analysis of the existing Animal Identification Law in line with international best practice and screen the current Animal Identification Law and identify gaps and give recommendations which parts of the law are subject to alignment with international standards and best international practices. II/ Draft of the Required Chapter\Missing Parts of Current Animal Identification Law. The aim is to revise the current Veterinary Law in line with the agreed recommendations by adding new Chapters and making changes and amendments to the existing ones. III/ Make presentation/workshop with practical demonstration on his/her recommendations and discuss them with the beneficiary and all concerned parties. IV/ Finalize and provide the beneficiary with the draft of revised Animal Identification Law. SECOND STAGE 1. Prepare drafts of technical documentation for discussing and approval on the objectives, the scope, the animal species involved, the organizational arrangements, the choice of technologies for identification and registration, the obligations of the involved parties, confidentiality, penalties, issues related to access of information, methods of information exchange and equitable means for financing programmes in line with international best practice. 2. Review and carry out gap analysis of the existing guidelines for the stakeholders of Animal Identification Law. 3. The Consultant, in collaboration with officers of the State Veterinary and Livestock Development Committee and on a basis of provisions of Codex Alimentarius Commission and OIE Animal Health Codes is developing, discussing the drafts and preparing pre-print versions of the: I/Techniques for animal identification guidelines; II/ Guidelines for Import and Export of Animal and Animal Genetic Material III/ Animal Handling Guidelines; IV/Construction Guideline 1 – Modern Farms; V/Feedlot Health Management Practices; VI/Quarantine Station Operation Guideline; VII/Livestock Disease Outbreak Investigation Guideline; VIII/ Pre-

			<p>purchase Inspection Guideline; IX/ Ante-mortem Inspection Guideline; X/ Hygiene, Dressing and Carcass Handling Guideline; XI/Meat Handlers Personal Hygiene Guideline; XII/Meat Inspection Guideline ; XIII/ Meat Inspectors and Inspector Veterinarians Guideline; XIV/ Meat Transport and Handling; XV/ Meat Transport and Storage Guideline; XVI/ Construction Guideline 2- Slaughterhouses</p> <p>Deliver ongoing consultancy during the implementation of animal identification, movement control and traceability.</p>
April - September 2019 Macedonia	Food and Veterinary Agency Delegation of EU in N. Macedonia Dr S.Tomeska-Mickova stmickova@fva.gov.mk 0038970409430	Food & Veterinary Information System (FVIS) Business Analyst	<p>The EU funded project <i>"Improved implementation of animal health, food safety and phytosanitary legislation and corresponding information systems"</i> includes component 3 Improvement of the current IT system in FVA. The expert SSTE IT Expert Sloboden Chokrevski advised the project staff in information analysis of - Food and Veterinary Information System by:</p> <ul style="list-style-type: none"> • Analysis of existing data in - Identification and registration module • Analysis of existing data in Animal health module (Including interface to Laboratory Information System LABIS for animal health of FVMS) • Analysis of existing data in Public health module (Including interface to Laboratory Information Management System LIMS for testing food and feed of FVMS) • Analysis of existing data in Inspection module • Analysis of the supporting modules: Administration module, reports and business analysis module and document management system <p>In particular the expert shall analyse the current FVIS - in relation to design and development of an improved IT system in FVA in accordance with the specifications for the development of information system of the FVA and in accordance with international and national requirements, standards and legislation.</p>
July 2019 Uzbekistan	World Organization for Animal Health OIE Dr Valentyna Sharandak Chargée de mission, Regional Activities Dept. v.sharandak@oie.int	PVS legislation expert	<p>The purpose of OIE PVS Pathway Veterinary Legislation Support mission is:</p> <ul style="list-style-type: none"> • to raise awareness of the essential elements of legal drafting that result in quality veterinary legislation and of the importance of quality veterinary legislation for effective operation of the Veterinary Services; • to assess compliance of the Member Country's veterinary legislation with Chapter 3.4 on Veterinary Legislation of the OIE <i>Terrestrial Code</i>; • to ascertain the Member Country's available human, financial and organisational resources to produce high quality veterinary legislation; • to identify or support the preparation of national priorities in terms of veterinary legislation; • to develop recommendations to modernise the Member Country's veterinary legislation.

June 19 September 19 Moldova Macedonia	World Health Organisation WHO - World Organization for Animal Health OIE National Bridging Workshop (NBW) Dr Valentyna Sharandak Chargée de mission, Regional Activities Dept. v.sharandak@oie.int	WHO-OIE NBW PVS Expert	The World Health Organization (WHO) and the World Organisation for Animal Health (OIE) are the two main international organizations responsible for proposing references and guidance for the public health and animal health sectors respectively. The main objective of the NBW is to provide an opportunity to human and animal health services of hosting countries to review their current collaboration gaps in key technical areas and to develop a joint road-map of corrective measures and strategic investments to improve the work at the animal-human interface in the prevention, detection and control of zoonotic diseases. The NBW includes work of the diagnostic laboratories in both human and animal health including their QA systems
May 2019 Montenegro	World Health Organisation Joint External Evaluation (JEE)	JEE PVS Expert	WHO Member States adopted a legally binding instrument, the International Health Regulations (IHR, 2005), for the prevention and control of events that may constitute a public health emergency of international concern. Through these regulations, countries are required to develop, strengthen and maintain minimum national core public health capacities to detect, assess, notify and respond to public health threats and as such, should implement plans of action to develop and ensure that the core capacities required by the IHR are present and functioning throughout their territories. Various assessment and monitoring tools have been developed by WHO such as the IHR Monitoring and Evaluation Framework (MEF), which includes inter alia the Annual Reporting Questionnaire for Monitoring Progress and the Joint External Evaluation (JEE) Tool.
2019/2020 On-going Uzbekistan	World Bank, International Bank for Reconstruction and Development and the International Development Association	International Consultant for Animal Identification, Registration, Movement Control and Traceability	The project “Livestock Sector Development Project” for development of a detailed plan for the implementation of the Animal identification, Registration, Movement Control and Traceability of animals program in the Republic of Uzbekistan in the framework of the project “Livestock Sector Development Project” with the participation of the International Development Association managed by Rural Restructuring Agency of Uzbekistan. Appropriate methodology will be developed for creating an animal identification central database with a register of holdings as a base for development of the Veterinary Information System (VIS) and developing an interface with official animal health (AH) control programmes to support execution and control of all measures as well as to create transparent and efficient certification of the health status of animals. The project will include identifying appropriate means of identification, coding systems for information management, types of ID devices, software/hardware and required legislation changes (when necessary), the roles and responsibilities of the various stakeholders involved in implementation of the systems, costs, and possibility of cost sharing. Develop strategies for implementation of a full operational animal I&R and movement control system and train the personnel responsible for implementation of the system.

04-06 2018-2019 Georgia	EU European Neighbourhood Programme for Agriculture and Rural Development in Georgia, Phase II (ENPARD II)	Food Safety, Sanitary and Phytosanitary Measures Expert	European Neighbourhood Programme for Agriculture and Rural Development in Georgia, Phase II (ENPARD II) SECOND TRANCHE REVIEW MISSION. The primary purpose of the evaluation mission was to examine the status of compliance with the General Public Policy Condition and Specific Conditions/Indicators for disbursement of the Second Tranche (worth up to €9.0mn). The Specific Conditions are grouped under three Policy Areas: 1. Enhanced competitiveness and sustainability of the agriculture sector; 2. Improved SPS, food safety and food quality standards and procedures for inspection and control (three activities and 13 Indicators); and 3. Improved employment and living conditions in rural areas through diversification of the rural economy. The second area covered by expert included registration of Food Business Operators (FBO); Training of veterinary and food inspectors; Accreditation of Laboratories; Equipment of border inspection posts; Procedures for control of products of non-animal origin and Adoption of food quality schemes (Registration of organic producers, PGI and PDO).
11-12 2017 Tajikistan	OIE - World Organization for Animal Health Dr Valentyna Sharandak Chargée de mission, Regional Activities Dept. v.sharandak@oie.int	PVS Follow Up Expert	OIE PVS Evaluation Follow-up Mission is conducted every 3 to 5 years; PVS Evaluation Follow-up Missions serve as a measuring and evaluation tool to monitor the progress that countries have made in sustainably improving their compliance to OIE's intergovernmental standards. Cross-referencing to the diagnosis of the initial PVS Evaluation and considering the goals established during the PVS Gap Analysis, this Mission assesses and monitors progress made (change in legislation, structure, national and international investments, technical capacities, etc.), registering improvements, acknowledging confirmed actions to maintain existing performance levels, and noting new or unaddressed deficiencies. The output is an updated comprehensive diagnosis to guide and accordingly revise the Veterinary Services' strategic initiatives. The evaluation is determining levels of advancement in budgeting, operational and emergency funding, capital investments, Management of resources and operations, laboratory system and QA, veterinary inspection controls in animal health and public health including quarantine and border inspection controls (http://www.oie.int/fileadmin/Home/eng/Support_to_OIE_Members/pdf/PVS_A_Tool_Final_Edition_2013.pdf and http://www.oie.int/support-to-oie-members/pvs-evaluations/oie-pvs-tool)
