

**INSTITUTE FOR ACCREDITATION OF THE
REPUBLIC OF NORTH MACEDONIA**

**WORK PROGRAMME
of the Institute for Accreditation of the
Republic of North Macedonia
for the year 2026**

Act: PR 2026

Pursuant to Article 5 Paragraph (2) of the Law on Accreditation (“Official Gazette of the Republic of Macedonia”, No. 120/09, 53/11, 41/14, 53/16, and 83/18), the Government of the Republic of North Macedonia, at its session held on 10 February 2026, adopted the following

Work Programme of the Institute for Accreditation of the Republic of North Macedonia for the year 2026

I. Introduction

Pursuant to the Law on Accreditation, the Institute for Accreditation of the Republic of North Macedonia (hereinafter: IARNM) is a public institution that performs the activities and tasks as a single national accreditation body, in line with the prescribed accreditation procedure based on this and other laws and supervises meeting the accreditation requirements.

Accreditation is a procedure for formal recognition of the capacity to perform certain activities in the sense that a certain body for conformity assessment fulfills the requirements stipulated by national, European, and international standards, relevant legislation, IARNM procedures, as well as the recommendations of European and global accreditation organization. Having in mind its role as a tool of the regulators and the state, in certain areas, accreditation is prescribed as a legal requirement that a certain entity must meet if its operations require a specific authorization issued by a competent state body.

The main areas in which accreditation procedures are performed are:

- testing and calibration laboratories,
- medical laboratories,
- bodies that perform certification of products, processes, and services,
- bodies that perform certification of management systems and
- inspection bodies.

Accreditation is an internationally recognized tool that indirectly ensures and guarantees the safety and quality of products and services, free development of international trade, reduces costs and operational errors, at the expense of increasing efficiency and economy in the use of material and human resources.

Accreditation provides for the facilitation of world trade. This is because its primary significance or benefit lies in the fact that once examined, certified products and services under the accreditation sign do not need to be re-examined. Taking into account the fact that IARNM is a signatory to three important international agreements that provide this benefit, the same also applies to domestic products and services when placed on the market in and out of the country.

Namely, IARNM, as a full member of the European and World Accreditation Organizations, is a signatory to the international Agreements for mutual recognition of accreditation certificates, namely:

- With the European Accreditation Organization (EA), it is a signatory to EA-MLA (Multilateral Agreement – MLA¹),
- With the International (World) Organization for accreditation of laboratories, inspection bodies, and organizers of proficiency testing (ILAC), it is a signatory to ILAC-MRA (Mutual Recognition Arrangement - MRA²) and
- With the International Accreditation Forum (IAF), it is a signatory to the IAF-MLA Multilateral Agreement (MLA³) for accepting certificates and reports issued by accredited conformity assessment bodies worldwide.

As of January 1, 2026, the two international organizations ILAC and IAF merged into one organization, Global Organization for Accreditation Incorporated, to which IARSM is a full member.

By signing these Agreements, IARNM opened the doors for domestic products and services on the European and global market, in accordance with the principle “once accredited, accepted everywhere”.

Namely, the main benefit of the Agreements is that the documents issued by the Macedonian accredited conformity assessment bodies, in accordance with the standards MKC EN ISO/IEC 17025 for testing and calibration laboratories, MKC EN ISO/IEC 17020 for inspection bodies, MKC EN ISO 15189 for medical laboratories and MKC EN ISO/IEC 17065 for certification bodies for products, processes and services and MKC EN ISO/IEC 17021-1 for certification bodies for management systems, are recognized at European and global level.

The successful realization of the key determinations of IARNM at the international level so far is not only an additional incentive but also an obligation to fulfill the strategic interest and vision of IARNM in order to maintain and strengthen the status of a full member in international accreditation organizations.

II. Objectives of the IARNM Work Programme for the year 2026

It is the strategic interest and goal of IARNM to continually maintain and strengthen the accreditation system, which will provide confidence in the capacity of the conformity assessment bodies (certification bodies, testing and calibration laboratories, medical laboratories, and their inspection bodies) and also ensure free trade in domestic products and services in European and global markets.

Accreditation, both globally and in the Republic of North Macedonia, plays an important role in strengthening the internal market, and the quality and security of life, and its primary role lies in the development of the domestic economy and its integration worldwide. However, for the Republic of North Macedonia, it is a particularly important instrument as a support for its integration into the European Union.

¹ EA-MLA is an agreement signed between the accreditation bodies, EA members, for the recognition of equality and confidentiality, and thus the acceptance of accredited certification, inspection, calibration certificates, and test reports throughout Europe.

² ILAC-MRA is an agreement signed between accreditation bodies, and ILAC members, for the recognition of equality and confidentiality, and thus the acceptance of accredited inspection certificates and test reports worldwide.

³ IAF-MLA is an agreement signed between accreditation bodies, IAF members, for the recognition of equality and confidentiality, and thus the acceptance of accredited certificates issued by accredited certification bodies for products and management systems worldwide.

Taking into consideration the benefits from the realization of the previously projected plans and objectives of IARNM, which stand as a recognition of the successful performance of the accreditation activity, as well as the potentials that arise from them, their multifold significance should also be considered.

Hence, the main activities of IARNM in 2026 shall focus on maintaining and upgrading the quality management system in accordance with the requirements of the standard MKC EN ISO/IEC 17011:2018, as a basic precondition for implementing the Agreements.

1. Primary objective for Programme realization:

Maintenance and upgrade of the quality management system of IARNM in accordance with the requirements of the MKC EN ISO/IEC 17011:2018 standard, as the basic and only standard according to which IARNM operates and conducts its accreditation procedures.

2. The specific objectives for Programme realization are as follows:

- implementation of annual activities related to assessment procedures for maintaining accreditation of already accredited bodies and implementation of procedures for initial assessment and increasing the number of accredited bodies by IARNM, which will depend on institutional strengthening through the development of personnel and organizational solutions,
- institutional strengthening through new personnel and organizational solutions and coordination of accreditation activities by promoting the current and increasing the number of employees at the institute, as well as increasing the number of technical assessors and experts, and upgrading their competencies,
- preparation and implementation of the upcoming fourth re-evaluation by EA after signing the EA-MLA Agreement,
- continuous commitment to facilitate global trade by accepting the results of accredited conformity assessment bodies,
- increasing the activity of technical committees to provide necessary technical support for accreditation activities,
- promoting the benefits of the accredited activities of conformity assessment bodies accredited by IARSM to members of the Macedonian economy,
- digitalization and application of sophisticated technical solutions in the field of artificial intelligence regarding the work process in IARNM,
- strengthening cooperation and providing technical support to the ministries and other institutions for any issues related to the accreditation procedures,
- active regional collaboration and cooperation with European and international accreditation organizations,
- ongoing activities to gain more trust from stakeholders,
- upgrading the already established cooperation with the Chambers of Commerce in the Republic of North Macedonia, the Consumers' Organization of the Republic of North Macedonia, economic operators, and other commerce entities,
- deepening and expanding the cooperation with the national accreditation bodies from the region, Europe, and the world, and
- participation in the realization of international projects.

The realization of the Programme goals will be carried out with the funds provided in the Budget of the Republic of North Macedonia for 2026, as well as through participation in projects such as TAIEX and TWINNING – Instruments of the European Commission, GIZ German Society for International Cooperation, and other project activities at the international and domestic level.

III. Projected activities for Programme realization

In the Budget of the Republic of North Macedonia for 2026 (Official Gazette of the Republic of North Macedonia No. 253/25), section 10001 - Ministry of Economy, Subprogramme 51 - IARNM, for the categories 40 - Wages and allowances, 42 – Goods and services, and 48 - Capital expenditures, there are financial resources projected in the amount of MKD 12.002.000.00 on account 637/603, and MKD 31.100.000.00 on account 631 or a total of MKD 43.102.000.00.

- About 26.15 % of the funds are intended for salaries of employees from the Budget of the Republic of North Macedonia - account 637/603 IARNM.
- About 67.58 % are intended for goods and services from accounts 637/603 and 631 IARNM.
- About 5.80% of the funds are intended for capital expenditures.

Institute for Accreditation of the Republic of North Macedonia

Category Item	Description	Budget 2026 (in 000 MKD)		Total expenditures
		637/603	631	
	Expenditures	12.002.000	31.100.000	43.102.000
40	Salaries and allowances	11.272.000	0	11.272.000
401	Basic salaries	7.963.000		7.963.000
402	Social security contributions	3.113.000		3.113.000
404	Allowances	196.000		196.000
42	Goods and services	730.000	28.400.000	29.130.000
420	Travel and daily expenses	0	2.200.000	2.200.000
421	Utilities, heating, communication, transport	100.000	2.000.000	2.100.000
423	Materials and small inventory	40.000	700.000	740.000
424	Repairs and ongoing maintenance	90.000	2.500.000	2.590.000
425	Contracted services	500.000	16.000.000	16.500.000
426	Other current expenses		5.000.000	5.000.000
427	Temporary employment			0
46	Subsidies and transfers	0	200.000	200.000
464	Other transfers		200.000	200.000
48	Capital expenditures	0	2.500.000	2.500.000
480	Purchase of equipment and machinery		1.000.000	1.000.000
481	Construction buildings		500.000	500.000
485	Investment and non-financial assets		1.000.000	1.000.000

To review and maintain the efficiency and upgrade the established national accreditation system in accordance with the Law on Accreditation, standard MKC EN ISO/IEC 17011:2018, the rules of the European Accreditation Organization, the World Organization for Laboratory Accreditation, and the International Accreditation Forum (EA, ILAC, and IAF) and the internal documents of IARNM, it is necessary to implement the following activities:

1. Accreditation activities

In the official register of IARNM at the moment of preparation of this Work Programme, there are 222 active accredited bodies for conformity assessment, and procedures are underway for new accreditation applications. In 2026, regular inspections of the already accredited bodies will be performed, and at the same time, IARNM will decide upon newly submitted applications for accreditation, on the basis of which it expects an increase in the number of accredited bodies for conformity assessment. In 2026, IARNM will begin preparing a transition plan to the new EN ISO/IEC 17020 standard and other accompanying mandatory documents.

In accordance with the Law on Accreditation, as well as the obligations arising from the signed international agreements, IARNM will continuously maintain and improve the overall accreditation system.

As for the development activities, due to the lack of essential professional and competent staff, IARNM is currently facing a serious problem in responding to the current activities and the challenge of developing new accreditation schemes and areas. These activities are carried out upon a submitted request and market research, which should be conducted in cooperation with interested parties, assisted by the work of the Technical Committees, in accordance with the specific needs of the Republic of North Macedonia and the needs of clients, the Government, and the economy.

The development of new schemes and areas is a prerequisite for the institutional strengthening and improvement of the capacities of IARNM, which also implies a fair resolution of the status of employees who are at an inadequate level compared to similar regional institutions, which is a basic prerequisite to ensure impartiality and independence in work as well as to ensure quality and competent staff for future challenges and activities.

As in previous years, the activities for performing accreditation activities abroad will continue over the course of 2026, in line with the rules for cross-border accreditation.

Required funds..... 14,000,000.00 MKD

2. Preparation and implementation of the fourth regular re-evaluation after signing the Agreement on Mutual Recognition of Accreditation Certificates with the European Accreditation Organization (EA-MLA)

According to the rules, plans, and work programme of the European Accreditation Organization (EA), the fourth regular re-evaluation after the signing of the Agreement on Mutual Recognition of Accreditation Certificates with the European Accreditation Organization (EA-MLA) shall be carried out in May 2026. The re-evaluation will include an overall assessment of the accreditation system and the operation of IARNM, so in the current year, the focus of interest will be on undertaking preparatory activities to improve the system and overall operation. The activities will include preparation of the Self-Assessment Report, upgrading and revising the documents of the IARNM quality system, staff strengthening, upgrading of competencies through educational activities, activities for harmonization in work, planning of organizational

and technical resources and sources for organizing the assessment, returning employees to the main premises of the institute, and more.

Required funds..... 1,000,000.00 MKD

3. Training organization

Maintaining and upgrading the competence of both the employed assessors and the external assessors and experts of IARNM is essential, but also a primary obligation that arises for IARNM from international agreements, as it is a basic precondition for quality and proper performance of accreditation procedures.

At the time of preparation of this Work Programme, the List of Active Assessors and Experts consists of 36 Lead Assessors, 116 Technical Assessors и 58 Experts. Nine lead assessors are from the IARNM staff, whereas the rest are external collaborators. In addition to assessors and experts from the Republic of North Macedonia, the list contains assessors and experts from other accreditation bodies, who are members of EA or with whom IARNM has signed a cooperation agreement. Namely, in order to meet the requirements of the accreditation standards, as well as to respond to the manifested needs for accreditation, technical assessors and experts from abroad are engaged in the accreditation procedures. The percentage of their engagement is decreasing on a yearly basis, since IARNM continuously strives to increase the number of competent domestic assessors and experts, in order to increase their engagement in the accreditation procedures.

Hence, in 2026, an account will be taken to strengthen the pool of assessors by ensuring participation in training, seminars, and workshops with the participation of candidates for assessors and technical assessors, and training with involvement in supervised assessments.

Over the course of 2026, IARNM envisages organizing or ensuring participation in the following training/workshops:

- Training for the employees and the members of the IARNM Council for the requirements of the standard MKC EN ISO/IEC 17011:2018 - General requirements for the accreditation bodies that accredit the conformity assessment bodies, standard according to which IARNM operates (obligatory, for maintenance of the accreditation system);
- Training for harmonization of assessors and coordinators in IARNM;
- Training for harmonization of lead and technical assessors for internal rules and procedures in accordance with the requirements of the standard MKC EN ISO/IEC 17011:2018;
- Workshops within the Technical Committees related to the accreditation criteria given in IARNM Rulebooks (if necessary);
- Training for assessors for ISO/IEC 17024 for certification bodies for personnel (if necessary);
- Training for the requirements of ISO 22000 and ISO 22003;
- Training for the requirements of ISO/IEC 27001 and ISO/IEC 27006;
- Training in clinical and forensic autopsy (if a suitable training organizer is at disposal);
- Training for modules in forensics according to ISO 17025 and ILAC G19 (if a suitable training organizer is at disposal);
- Training for ISO 20387 (if necessary);
- Exchange of experiences related to the risks to impartiality and the accreditation process;
- Training on the requirements of the standard EN ISO/IEC 17011:2017 (exchange of experiences);
- Training for trainers on the requirements of the standard ISO/IEC 17043:2023 - general requirements for the competence of organizers of proficiency testing;

- Training/workshop on the requirements for the new edition of the ISO 15189:2022 standard for medical laboratories aimed at lead and technical assessors for medical laboratories,
- Training on quality of agricultural products (PDO, PGI, and TSI);
- Training for flexible accreditation scope;
- Training for the requirements of the standard EN ISO/IEC 17025:2017;
- Training on specific requirements of the EN ISO/IEC 17025:2017 standard - measurement uncertainty, rules for declaration of conformity, opinion, and interpretation;
- Accreditation training for notification/approval/authorization purposes in the area of EU Regulations on Construction Products;
- Validation and verification training, EN ISO/IEC 17029 and EN ISO 14065;
- Training for EA assessors;
- Training/workshops organized by the Committees at EA;
- Training for the new edition of the EN ISO/IEC 17020 standard;
- Training for documents from European and international accreditation organizations (if deemed necessary);
- Training for assessors in the field of organic production (with all its specifics), especially organic production in third countries and for Regulation 848/2018;
- Training on ISO 16140 Microbiology of the food chain;
- Anti-corruption training;
- Training on the Amendment to EN ISO/IEC 17065:202X;
- Training on EN ISO/IEC 17021-1.

Training will be organized in line with the planned project activities and the training plan, the manifested needs, and the current transition periods of the international standards, and will be attended by the employees of IARNM as well as the stakeholders, assessors, and experts.

Part of the training is planned to be organized by IARNM, and part within project activities, EA, and in cooperation with other accreditation bodies.

Also, the Annual Training Plan for the IARNM employees will involve generic and specialized training in accordance with the legal requirements for upgrading the professionalism and competence of the administrative employees.

Required funds 2,800,000.00 MKD

4. Human resources

The Institute for Accreditation of the Republic of North Macedonia regularly employs a total of 14 people. In recent years, the Institute has continuously recorded an outflow of key personnel on various grounds and has a real need, but also an obligation, in accordance with the requirements of the MKS EN ISO/IEC 17011:2018 standard and the rules of the European and international accreditation organizations, to ensure and have an adequate staff capacity of professional and competent persons. Hence, in the current year, it is mandatory to employ a larger number of experts and promotions of current staff, to ensure optimal human resources as a basic requirement of the rules for the organizational and functional setup of a national accreditation body. Additionally, in order to ensure minimally uninterrupted functioning of the Institute until the moment of employment of appropriate personnel, we have also projected to engage personnel in accordance with the provisions of the Law on Transformation into Regular Employment. These engagements are critical for the performance of the basic competencies and maintaining continuity in the work of the Institute.

The operating funds include funds for the payment of salaries, as well as for the payment of compensation for other employment rights, and funds for compensation for hired persons in accordance with the law.

Required funds 12,785,000.00 MKD

5. Digitalization of the work process of IARNM

The digital transformation process of the workflow is being intensively implemented in IARNM. A unique accreditation information system (AIS) has been introduced as an integrated software solution, and the services for its maintenance and upgrading are provided by concluding public procurement contracts. Currently, work is being performed simultaneously on paper and digitally, and in 2026, several different portals are planned to be implemented to support digital operations. Cybersecurity of the work process is ensured through the purchase and use of licensed software programs and anti-virus protection, as well as through maintenance and system upgrades for Disaster recovery (DR) protection.

Required funds 1,000,000.00 MKD

6. Cooperation with state authorities

IARNM will continue with activities that deepen the active cooperation with the state bodies through participation in the work of several working groups established by the Government of the Republic of North Macedonia, the Ministry of Economy and Labor, the Ministry of Environment and Physical Planning, the Ministry of Agriculture, Forestry and Water Economy, the Bureau of Metrology, the Ministry of Digital Transformation, the Ministry of Energy, Mining and Mineral Resources, the Ministry of Foreign Affairs and Foreign Trade, the Ministry of Finance- the Public Procurement Bureau, as well as other line ministries and state bodies.

Moreover, IARNM will continue with increased participation in the work of the Technical Committees at the Institute for Standardization of the Republic of North Macedonia.

Cooperation can also be established with other entities that can contribute in partnership and strategically to the promotion of accreditation and its significance and the improvement of the condition of the quality infrastructure by bringing together all stakeholders of the national quality infrastructure and interested parties in an appropriate legal entity at the level of the Macedonian Quality Society (universities, state bodies, consumer organizations, chambers of commerce, representatives of the business community).

Required funds..... 27,000.00 MKD

7. Conducting internal inspections

Pursuant to the requirements of the standard MKC EN ISO/IEC 17011:2018, the realization of the regular internal inspection of the employees in IARNM is a mandatory obligation and a need in order to maintain and enhance the quality management system in IARNM. The internal inspection in 2026 will be conducted in accordance with the requirements of the standard MKC EN ISO/IEC 17011:2018.

8. Management re-evaluation

Pursuant to the Quality Policy and Work Procedures of IARNM and the requirements of MKC EN ISO/IEC 17011:2018, re-evaluation of the IARNM management (Director, President of the Council, quality manager, heads of departments and sectors) is performed once a year.

The purpose of the re-evaluation is to define and redefine the policies and objectives of IARNM and examine the effectiveness of IARNM's quality management system through the analysis of documents, reports, complaints, objections, remarks, and inconsistencies.

9. Promotion of the Accreditation System

The promotion of the accreditation system is of crucial importance for raising awareness of the importance and role of accreditation in everyday life and the economy. It is vital to inform the public about the application procedure and the procedure for obtaining the status of an accredited body, i.e., to bring interested parties closer to the requirements for accreditation, as well as to promote its benefits.

Independently or in cooperation with relevant stakeholders in the economy, IARNM expects to implement promotional events through which all interested parties will be informed about the benefits and usefulness of signing the international agreements EA-MLA, ILAC-MRA, IAF-MLA, and the use of signs and symbols that prove their signatory status.

As part of the promotion of the accreditation system, the following activities are projected:

- Preparation and publication of promotional and educational material in the field of accreditation, on topics recommended by European and global accreditation organizations;
- Media promotion of accreditation;
- Issuing the Annual Report on the work of IARNM for 2025;
- Promotion for awarding certificates to accredited bodies, on the occasion of June 9, "International Accreditation Day";
- Organizing and/or participating in conferences or other types of gatherings on topics relevant to the role of accreditation;
- Maintenance and upgrade of the official website of IARNM and increased presence and activity on social networks.

Required funds..... 1,700,000.00 MKD

10. Work of the IARNM Council and the Supervision Board of the Material-Financial Operation of IARNM

According to the Accreditation Law, the IARNM Council consists of 11 members, and the Supervision Board of the Material-Financial Operation of IARNM consists of 3 members.

At the time of preparation of this Work Programme, the Council has and operates with a total of nine appointed members and needs to be completed with two more members, while the Supervisory Board needs to be completed with one more member.

Required funds..... 2,900,000.00 MKD

11. International activities

IARNM is a full member of the European Accreditation Organization (EA), the International (World) Laboratory Accreditation Organization (ILAC), and the International Accreditation Forum (IAF).

As a full member of the three organizations, IARNM must participate in the annual meetings of the General Assemblies of EA, ILAC, and IAF, as it is a member with an active right and duty to participate and vote for new measures and resolutions in the field of accreditation worldwide, which should then be vertically transposed to the national level in an appropriate legal form. Also, IARNM employees must participate in the meetings within the Technical Committees of EA, ILAC, and IAF and their working groups, in order to contribute to the adoption of the documents of these organizations, which are of a mandatory and advisory nature.

As a full member of the EA, part of the staff is planned to be included as evaluators within the EA teams for evaluation and re-evaluation of other accreditation bodies - signatories to the EA MLA Agreement. The Institute is obliged to deliver this activity for EA in a certain number of evaluation days, for which already trained assessors-employees in IARNM will be hired, and training of other assessors is underway. Participation in EA assessment missions is at the expense of the national accreditation body from which assessment team members are delegated.

Based on full membership, IARNM is obliged to pay an appropriate amount in the name of an annual membership fee for 2026, namely:

- Based on full membership in EA and the signatory status to the MLA Agreement, IARNM should pay an annual membership fee of EUR 11,483.00.

- Based on full membership in ILAC and the signatory status to the MRA Agreement, IARNM is obliged to pay an annual membership fee of 7.000,00 Australian dollars,

- Based on full membership in IAF and the signatory status to the MLA Agreement, IARNM is obliged to pay an annual membership fee of 2.000,00 US dollars.

IARNM will also maintain and upgrade its cooperation with the national accreditation bodies from the region in accordance with the signed bilateral agreements with Serbia, Montenegro, Bulgaria, Albania, Croatia, Turkey, Kosovo, Bosnia and Herzegovina, and Moldova. IARNM will actively contribute to the concluded Agreement for cooperation with the national accreditation bodies of the countries in the region within the initiative "Open Balkans".

IARNM will also maintain and upgrade cooperation agreements with the UK Accreditation Service (UKAS), the German Accreditation Body (DAkkS), the Federal Accreditation Service of the Russian Federation (RusAccreditation), the Agreement with the Bulgarian Accreditation (BAS), the Czech Accreditation (CAI), and the Slovenian Accreditation (SA).

IARNM shall proceed to conclude new cooperation agreements with other national accreditation bodies, as necessary.

The purpose of these agreements is the organization of joint training for assessors, exchange of knowledge, exchange of experts and assessors at a regional level, and cross-border accreditation that will contribute to the construction of an efficient accreditation system. Within the agreed regional cooperation, the activities of mutual participation in monitoring during the performance of assessments by the national accreditation bodies from the region will continue.

Required funds..... 2,600,000.00 MKD

12. Management and current operation of IARNM

For the smooth execution of the current activities of IARNM, funds for the operation of IARNM will be provided from IARNM's Budget for 2026, whereby the same have been meticulously planned for maintenance and upgrading of the ICT - infrastructure, digitalization of the overall operation of IARNM through maintenance and upgrading of the unique accreditation information system (AIS) IARNM, replacement of technologically obsolete equipment, maintenance and upgrading of hardware and software solutions, which should provide effective, efficient, safe and secure operation of the Institute. The digitalization process is also in line with the government project for digitalization and providing easy access to services for end-users. The current maintenance includes maintenance of the premises, maintenance of vehicles, procurement of information and communication equipment, etc.

Required funds 4,000,000.00 MKD

IV. Final provisions

Up to 31.03.2027, IARNM shall submit a Report for the implementation of IARNM's Work Programme for 2026 to the Government of the Republic of North Macedonia, which will include the achieved results and financial indicators, as well as an explanation for possible deviations from the projected activities.

This Work Programme shall enter into force on the day following the day of its publication in the "Official Gazette of the Republic of North Macedonia".
